

# Channelview Complex turnaround

April 5 – June 2, 2024\*

1,500

Estimated number of professional contractors on-site throughout the event

250

LYB employees assigned to the project

\$5,000,000

Estimated economic impact from local hotel and meals\*\*

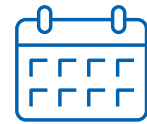

2,000

tasks planned within the scope

## What is a turnaround?

A significant maintenance and engineering activity when the unit/area/plant is shut down, when equipment is inspected, cleaned, repaired, removed, or installed. Generally, the work performed during a turnaround can only be done when the unit/area/plant is not operational.

3

Years in planning to develop improvement projects, maintenance work

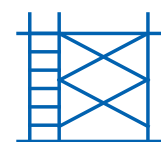

600,000

Labor hours associated with the turnaround

100,000

Pairs of earplugs distributed for safety

2,000,000

Cubic feet of scaffolding built – which would completely scaffold the San Jacinto Monument 3 times

If you have questions about our turnaround project, email [askchannelview@lyb.com](mailto:askchannelview@lyb.com)

\*Dates are approximate

\*\*Based on U.S. General Services Administration (GSA) figures for the area (Channelview: \$122 hotel, \$59 meal per diem, estimated 900 number of visiting workers, 30 days in town)

# Channelview Complex turnaround

April 5 – June 2, 2024\*

## The turnaround and area traffic

With additional staff onsite, traffic along the plant's entrance will experience heavier flows at certain times. Work schedules have been set to minimize the impact of this traffic.

By early April, lighted, orange traffic flow signs will be placed on Wallisville and Sheldon road to notify travelers. Law enforcement officers will also be along the roadway operating the lights at the Sheldon and Newton and Sheldon and Wallisville intersections.
